

LDC HyperFrame™

ePOD_

**LEADERSHIP
DATACENTER**

We build your digital ecosystem

Powering your next-gen IT infrastructure

LDC HyperFrame™ ePOD – your interface between grid power and IT infrastructure – ensures a clean and constant power supply to your IT infrastructure. It protects the system, prevents data loss and can supply up to 2 megawatts IT load.

The concept is based on three core principles

- Modular**
Scalable POD framework enabling fast, precise capacity expansion.
- Standardized**
Standardized building blocks for repeatable quality and fast deployment.
- Industrialized**
Prefabricated and factory-tested for accelerated, low-risk implementation at industrial-grade quality.

Your Leadership advantage

- **Built on deep modular DC expertise**
- **Fully equipped & pre-comissioned**
- **In-house off-site production**
- **Compact with minimal footprint**
- **Vendor-neutral flexible supply chains**
- **Highly adaptable to your needs**
